## Reality Check On The New World Order - Foster Gamble (Part 1)

**Guest:** Foster Gamble

**Date:**

**Length:** 37:13

*Lilou's Juicy Living Tour videos and transcripts are made possible from your donations.  
Thank you for your support <http://juicylivingtour.com/support-the-juicy-tour/donate-now/>*

**LILOU:** Hello, my juicy Co-Creators. Lilou here on the Juicy Living Tour. Today I'm in Santa Cruz, beautiful Santa Cruz in California. And I think we're going to very much enjoy this conversation, it's going to be very educational, an eye-opener because I'm sitting next to you Foster. Thank you for accepting to do this interview in your own living-room. Thank you.

**FOSTER:** A great pleasure to be with you again Lilou, and in person this time.

**LILOU:** Yes. Not on Skype. Actually it was very successful video and it went out to over a 100,000 video views, which is nice on Internet. And now I know that it's not so much about the quality of the image, but it's the content that is so important. And you bring a lot of important information out into the world. So, I feel this is an essential conversation to have right now and hopefully it will spread all around the world. And this is what you have done, through your movie, 'Thrive' and we are going to discuss about the different components of that movie. And what you really wanted to bring out into the world. Your last name is Gamble, so you are from the Procter & Gamble family, but you decide to take a different route to bring out some information. You've been very curious, right?

All your childhood growing up and you went to Princeton University. And you are bringing some important information about economics, about the money, about the global agenda, domination agenda. So, I'm thrilled to start with that part first to kind of point out, before we go into the solution, before we go into those partners and those codes and all those beautiful solutions that you are proposing. I would like to first talk about what have you found out, so there is a lot. But it's important to go back to those things, so first of all where did you find out about how a lot of people speak of the new world order. But really, what you have found out about how people or government or the corporation are controlling us.

**FOSTER:** Well, the title of our film was, "THRIVE: What On Earth Will It Take?" And so, Kimberly and I set out to see what was in the way of our thriving. Because unless we know what's in the way, then we are not going to have... Unless we know what's in the way, it's going to be very difficult to create effective solution. So, one of the things that we did was follow the money. And for those who's seen the film, and have been watching what's going on in the news in the last year and a half. It's only been more validation. That when you follow the money in any sector, whether it's media or education or science or banking or food. They all go up to the same sort of sources, they go up to a small group of banking families who are basically controlling the banking scam. This deal where they tell us that economic is so confusing; we should just leave it to the experts. But those so called experts have basically set up a situation where they get to make up money whenever they want, and you and I don't. In fact we have to pay them interest to use that money that they just made up.

So, of course just like a monopoly game where they are controlling the bank. And through that kind of scheme they can end up controlling every sector, if we let them get away with it. And they are almost there. So, if we look at what's happened in the last year and a half with the Libor scandal and the MF Global Scandal. And now what's coming out about the Federal Reserve was finally, had a little bitty audit and it turned out that they had sent 16 trillion dollars to other Central Banks around the world. And that's just what they had to tell us. That's the lives of our children, grand children and their children paying back interest on that fake debt. And that's what they are trying to use to try to take over control of really every sector.

**LILOU:** And so, through... But how does that impact us every day, not having this kind of information?

**FOSTER:** It's basically a giant debt scam, all the money that people are fighting over. And it is created out of debt rather than in acknowledgement of goods and services. So, when you borrow money that they just make up. Then they are getting your wealth, you are putting yourself in debt, you are working the rest of your life to try to pay them back. So, the wealth and power is getting consolidated into the hands of the very few. And so, that was the kind of follow money section, the second chapter of our film. And what followed that was the, 'Global Domination Agenda' because once you realize that there are actually very few people who are controlling this, so called new world order. Then the important question is what's their agenda? Are they doing this for our benefit? And that's a whole other topic; we can go into if you want.

**LILOU:** Yes, please. Let's go right into it, because all of this is part of a big conversation anyway. So, through your website and your work and on the movie, you have put it in different pieces. But it's definitely... All of it is linked. So, from the money. Can we say new world order or is it? This is not how you call it really.

**FOSTER:** That's a term that they use themselves. George Bush has used it in our film, you see Henry Kissinger using many of the world leaders now use this term. New world order sounds good; we need a new world order. But what we don't need is a centralized control, where a few people tell everyone else what they have to do with their lives.

**LILOU:** So, it has nothing to do with the conspiracy theory?

**FOSTER:** Well, the whole notion of conspiracy theory was created by the CIA in 1967 to try to distract people who were questioning the war on commission. About the real source of John F. Kennedy's death. So, that was created to try to stop conversations where people would start discovering exactly these agendas. So, Kimberly and I preferred to call ourselves, 'Conspiracy Analyst' we liked to find the facts and then analyze those facts, and try to make sense of them. And what happened with Thrive was we didn't hold back, we covered 14 different very controversial topics. But they actually make more sense when you step back and they all fit in together. And people have responded all over the world to that coherence, because it makes a lot more sense than what we are hearing from the corporate media.

**LILOU:** But how do you find out the true information and the not so true information, or what even the CIA or other people put out there? Because it seems, it's confusing there is so much out.

**FOSTER:** Through the Internet you can get a lot of much more good information than it used to be able to get, when you were only getting from the corporate media.

But of course you need to go and do your fact checking. So, we hired two independent fact checkers, to check all the facts in the Thrive movie and then the thrivemovement website. So, that's a beginning. Once you start finding out what's really going on, then you still usually have to speculate because these decisions are made behind closed doors at places like the Bilderberg Group and the Council on Foreign Relations, and the Trilateral Commission. And then secret societies that you probably don't even, most people never even heard of. So, really what we are trying to do is pull on these threads and find out what's really going on. And once we get that, then we can look and see. Alright, it's a lot of bad news; however once you get your feet on the ground with what's really going on, then you can go, "Okay. At least now I understand, so now we can start creating the antidote to those destructive agendas, the deceptive non-transparent processes.

**LILOU:** So, is it true that some people would like that there is less people on this earth?

**FOSTER:** As far as I can tell, there is quite a bit of documentation. Various quotes from high-level people, the Georgia Guidestones, people want to look that up on the Internet. And it makes sense. If you look from the point of view as someone who wants to control the entire world, most of us don't wake up in the morning with that thought. Unfortunately there is some who do, and we need to wake up to that fact. Because in a world where we now have corrupt political systems, corrupt banking systems, corrupt media systems, corrupt corporations. The people, who are willing to go along with that corruption, actually create that corruption are going to rise very rapidly.

Really sociopaths and psychopaths do well in those systems, because they don't have the usual conscious going on about, "We can't kill a million innocent people in Iraq." That thought would stop most normal people. But for other people was like, "No. Wait a minute, we want that oil. We want to control the Middle East. Let's go ahead." And so, it's important for people to wake up and realize that most human beings are wonderful caring compassionate people, who would literally as we've seen so many times give the sure off their back in a storm. But those aren't the people who are running the New World Order. So, we just need to wake up realize there. Unfortunately, sick damaged people who need healing. They don't need to be destroyed, they need to be healed but they need to be taken out of positions of power over other people's lives.

**LILOU:** How many people does that represent, those people that have that power?

**FOSTER:** Well, there is a famous book called, "The Committee of 300." Where some John Coleman spent decades researching who are these people, who are actually heading it up. Another source says probably 5,000 people in the whole world are actually running the show. The key thing is that is that it's a very small number in relation to seven billion people, who are actually looking to share the resources of this planet and to actually thrive. So, the biggest fear of the New World Order would be controllers. Is that people are going to wake up and realize that there should actually be free human beings living in a prosperous society on a healthy planet, and that's what's happening. Fortunately through the Internet, and through the courage of people like Edward Snowden and Bradley Manning and Julian Assange and Thomas Drake and Christian Megan and so many courageous whistleblowers, who are now coming and saying, "I know these things to be true, here are the documents. And then of course the government, and really with both sides, Republican and Democrats in this country at the top, rage against all, these traitors. These are people who are simply revealing the truth, particularly about the constitution and about the violations of it by our own government for their own good not for ours.

**LILOU:** So, what are those groups? Because your family was a big corporation. You were born in Procter

& Gamble. So, is that part of some of the companies that actually managed or how do you say? Influenced strongly the whole society?

**FOSTER:** Well, almost any of the fortune 500 companies are going to be complicit to some degree in this. My great, great grandfather got together with his best friend and started putting soap and candles together. And created a successful company that was famous for its integrity, they were the first company to have employees stock options in that time. It was something I was proud of in the beginning, but as it grew by the mid 90's, Dick Cheney was on the board. So, it's not something that I associate with proudly anymore. I don't use any of their products, but I'm grateful for the original ingenuity that ended up building some wealth that allowed me as one of the many, many descendants to turn around and use that money to actually expose what's really going on, on the planet.

So, we have a pyramid diagram in the film called, 'The Fall Of The Money Pyramid' that is really helpful. Because most people are brought up thinking, the president of the United States is head of the free world most powerful personnel on earth. Once you study this a little bit, you realize there are actually at least six levels above him for which he is dancing on the puppet strings. Because the government is becoming more and more obvious, it's owned by the corporations. Particularly after the citizens united decision, now they can just put as much money in as they want to bribe all these politicians. Nobody makes it to the top without accepting those bribes. And then they are basically doing the bidding of Wall Street and other corporations, and the banks after that. But above the corporations, like Proctor & Gamble they've got to get their capitalisation at cheap prices and they do it from the banks.

So, the banks are above the corporation. Then those banks need to get favours from the Central Bank, from the Federal Reserve in this country. And each major country has now it's Central Bank. And then above that is the Central Banks of Central Banks, the IMF and the World Bank, which is over, above all that. And finally at the top is the bank of International Settlement, which most people have never even heard of. The Rothschild and the Rockefellers created that to basically create a one world system based on their fiat money on their fractional reserve banking, where they get to be in control of the monopoly again. Fortunately that is now all getting exposed, and the major banks, there is five major banks in the United States. They are all trillions, hundreds of trillions of dollars in debt with their [\\_\\_\\_\\_\\_ 0:14:04.5](#) and so forth. So, they are actually broke. The US government is the most broke entity in the history of planet earth. So, it's all a shell game right now and it remains to be seen now. What are the solutions that can actually turn that around? Because their deception has under-cut their own authority.

**LILOU:** So, what happened in 2008 when there was this huge crash? Did some information leak actually to provoke that?

**FOSTER:** And I think this was an intentional crash, as was the crash in 1929. Which is now documented, the Federal Reserve has taken blame for that. They said they wouldn't do it again, but they turned around and of course did it again. Because, remember the goal of the, 'Global Domination Agenda' is not to restore well being to the lives of American citizens, it's to create a one world government with a one world currency, one world police force and so forth. All under the control of the international bankers. All the taxations will go into the World Bank and it will be run by this shadow characters behind the scenes.

So, in 2008 when the American economy essentially collapsed and it's not done yet. It's only smoking mirrors and printing billions of dollars a month that is keeping any assemblance of recovery going. And my search revealed to me that the ultimate goal is to collapse the united states, because the 300 and some million people who have a history of free speech and gun ownership. Independence is the major

hurdle to creating this one world government. So, as we described in the movie. I believe very clearly and it's only getting confirmed that their goal is to collapse the dollar, take down the US and then come in with this plan for, "Okay. Now we are going to have a one world cashless society." And the UN is going to be in charge, which was created by the Rothschild and the Rockefellers. And the World Bank is going to be the banker and now you are now you are all under our thumb. So, they are not that far away given the economic situation, given their control of the Central Banking system in almost every country in the world. But on the other hand, they didn't really plan on the Internet. So, Thrive has been seen but documented by around 18 million people. But so many people see HDVD and public screenings and home screens and so forth.

There is probably like 30 to 50 million more than a million a month are seeing it. And that is one many fantastic media resources, like your own station which is getting the word out about what's really going on. So, their biggest fear, the Illuminati's biggest fear is happening, people are waking up, they are finding out the emperor has no clothes. And they are saying, "We don't want to look at that. We don't want to have you guys in charge anymore." So, there is the largest spiritual movement in history worldwide, is people waking up from their spirit to their own sovereignty and linking up with other free beings around the world and saying, "No. We are going to change this game from the ground up. We realized that we are never going to get that from the corporation, from the bankers, from the governments."

**LILOU:** So, we are going to speak later on what it will take to thrive. Because this is definitely the exciting conversation, but it's important to get those facts to realize what's going on to wake up. Because we definitely can get some strengths from that also. What are some of the different things like in health, what's going on with the health system and the pharmaceutical for example? Because they are making quite a lot of money, there is big margins there aren't they? Through selling drugs.

**FOSTER:** We came to the sad realization in our research that Kimberly and I were doing, is that we don't have a health care industry in the US. We have a sickness maintenance profit making machine, and it's really true for most of the world. And so, Kimberly did a beautiful piece of in movie about her experience of discovering that cancer cures were being suppressed. If you picture just from a point of view of world domination, depopulation and profit making. It's not profitable for them to cure cancer, if what they can provide is chemo and radiation and that type of thing. So, literary many, many cure, real cures have been suppressed. I'm happy to say, just to give a little glimpse of the solution part there. We have been contacted by many, many inventors and healers from the around the world who are looking for ways to bring their technologies in their healing processes safely out. Because they recognize it's dangerous, but it's also time.

**LILOU:** Will go more. And I'm interviewing by the way Kimberly Gamble after this interview. So, this is definitely complementary and something to look at after or during. That will be quite hard one for me here. Now, we have to really take the time to listen to this information. So, where is the money for taxpayers going to? From the taxpayers, where is that money really? What did your research find?

**FOSTER:** Well, most of it goes about 60-70% of it goes to the military and paying this fake interest on these loans from the Federal Reserve. So, and then the rest of it goes to various entitlement programs and so forth and does some good. But what people are beginning to discover is that most of that money actually goes into the politician pockets, it goes into the corporation's pocket. And people who really need the healthcare, need good education and so forth are seldom getting either. So, ultimately we are going to need to actually question the notion of whether or not the government taking our money, whether we like it or not and then going and spending it basically how they want on Federal

Reserve on wars, on subsidizing GMOs and vaccines and all that type of stuff. Is in fact going to create a sustainable society, whether or not it's just in the first place and then whether or not it's actually going to create a sustainable society. And I would say unequivocally, no.

**LILOU:** Education, same thing, corporation are actually influencing the education and putting some things in place there have been put in for a long time. Do you think so?

**FOSTER:** We got to interview John Godo who is one of my heroes in the education field for the film. And the first question I asked him was, "John! You wake up tomorrow morning, no you are secretary of education and you get to do whatever you want. What kind of system of education would you put in?" And he said, "Foster! That's the wrong question." I said, "Really? What do you mean?" He said, "As soon as you are trying to put in a system it's no longer education, its schooling. It's mandatory indoctrination. Serving the corporate agenda." And that's exactly what we've got unfortunately. And so, you see all the high school dropouts and the depression among students, and the frustration and the hyperactivity and so forth. Young people do not want to get up at 6:00 AM and go and sit in a desk and be told information that's not either exciting to them or in many cases not even true about the history, economics, liberty that type of thing.

**LILOU:** Food is a big chapter of course, because everyday we eat food but we are not really conscious of what we put in our mouth. And we talk more and more about those GMOs.

**FOSTER:** Yeah. Imagine the 0:21:40.4 that a typical person goes through in their day of just eating breakfast or going to the food store, going to a restaurant, whatever. And trying to get some natural whole organic food that nature meant for us to eat for healthy nutrition, because if you look at the bovine growth hormone. You look at the antibiotics there in the food, you look at the fluoride in the water, you look at the GMO foods. And the Aspartame and the MSG and on down the line. Why in the world is our food so full of toxins? Not even to mention the pesticides, herbicides and fertilizers that are there before, it even gets harvested.

**LILOU:** Profits.

**FOSTER:** Well, profit is what keeps most people involved in doing that. But remember the people at the top have all the money that they could ever want, and they can print it when they need it. So, their motive is not profit, their motive is control and depopulation as far as I can tell and that is very, very dangerous. So, it's no accident that people are obese that they are sick dying early, hyperactive, all these type of thing. When you read, people like Russell Blaylock has done a lot of research, Mike Adams is doing fantastic research on this, Joseph Mercola. You read or listen to what they are describing in this, and it's purely intentional that those things are ending up in our food to keep us sick, to keep us in debt, to keep us dumb down, so we don't question this authoritarian system.

**LILOU:** Because when we don't eat well we feel really down, and we feel like not moving out of and not going out of our couch.

**FOSTER:** Yeah. And if the foods additives don't get you then chemtrails will, and the pesticides and just the electronic pollution and the radiation that's in the air. And so, this is not accidental. The good news is that it was basically put in place by a very few people with a destructive agenda. So, when we wake up to that fact then we can actually get rid of that agenda and restore each system to its wholeness.

**LILOU:** What is the role of HAARP in all these? We hear a lot of this HAARP, what does that stand for

and how bad is it?

**FOSTER:** It's the High Altitude Active... I can't remember the last two initials. But what really matters is that it's the largest internal ray on the planet, it's up in Alaska. It's kind of co-owned by the government and the oil companies. And they acknowledged early on, now they've tried to hide this information but they acknowledged it was for weather control. They actually bragged that they could bend the jet stream all the way down to Los Angeles and so forth. But with that equipment it's been proven, and they have the patterns you can read them that they cannot only do oil and gas testing from the atmosphere. But they can amp up the voltage of electricity that they are putting in, and take those same vibration.

What they do is they basically create a huge high pressure area that bends the bottom of the ionosphere up. And then when it snaps back down, it sends these electromagnetic pulses into the earth. And if they do at low key, they can just tell where the oil and gas is. But if they really amp it up, they can create earthquakes 0:25:08.3. And there are certain signatures; first of all you see certain lights in the atmosphere before one of those earthquakes. But also there are people who are measuring this in the earth's atmosphere around the planet, so they can tell when HAARP is turned on and off. And before the big earthquake in China and again in Chilean, again in Haiti. Their HAARP was turned on to maximum amplitude for like three days, and then cut-off the moment those earthquake started. So these same unwise people to say to give them the benefit of the doubt.

Who want to depopulate and control other people's lives for their own benefit or at least to try to manage their own fear and hold their wealth, are using weather control. They are using earthquakes; they are using what's called geo-engineering, same as the chemtrails. They are using all of this to try to gain control and sicken people, control their minds. And with the ultimate goal I guess is to end up with just enough people to serve them, but not so many that they can revolt, like a dead slavery revolt. And they end up then confident that their technology, their shadow government technology is going to heal the planet and then they are going to bring back out their organic seeds that they've been holding. That Bill Gates and Syngenta and Swedish government and others has built...

**LILOU:** Region, it was big. What is your view on what's happening up there in Norway with the big seed bank? Because I went all the way up there and I spoke to their government but I didn't get much information strangely now.

**FOSTER:** They won't tell. No. If the same people who are holding organic seeds like no one has ever done in history, are at the same time promoting GMOs and toxic vaccines in Africa, South America, Asia, US and so forth. Then that doesn't quite fit from a normal point of view and this is just one of many cases where what I find the best thing to do is put on the lens of the, 'Global Domination Agenda' horrifying as it is to do and say, "Okay. If I wanted to rule the world, then it would be effective to get rid of most people by making them sick and dumbing them down." And so forth, killing them in many cases with wars and so on. And then ultimately when the world is the way I want it, then restoring the health of the planet which I know should be there in the first place and bringing out the organic seed. So, I and my family and our ilk get to live on healthy planet, rather than realizing that everybody can right now. There is enough water, clean air, there is enough food resources for everyone to be thriving on the planet right now. The main problem is fear and non-transparency and the ignorance, and destructive world view of the people who right now are controlling most of the power centres.

**LILOU:** And feeling powerless.

**FOSTER:** Exactly. I have seen some testimonials, literary refugees from within the Illuminati. Who described when the secret meetings take place and people talk literary about how can we control the whole world. And what they keep talking about is what they call the x-factor, because no matter how much money, no matter how much military force, no matter how much media they can control. This thing called the x-factor keeps getting out of control, and really what it is the rest of us would recognize it immediately, its truth, its love, its compassion; it's the beauty of the human spirit and just of the life force itself. And obviously in the long run, no destructive human being are going to take over control of that. But the quicker we wake up the less damage is going to be done and hopefully we can actually thrive on a healthy planet now, rather than getting into some giant war that's going to set it back millions of years.

**LILOU:** Do you know how they decide and get together, and how often? And how does this work, this whole little thing of getting... How many people even?

**FOSTER:** I know only what I have heard from refugees and from what I read from people Jim Mars and Alex Jones, and David Egan and many others who have done copiers research on this. And there are secret societies in every country, every major country that usually involve a lot of the politicians, bankers and corporate leaders. And unfortunately it involves often times not only banking schemes and environmental destruction. But I ask myself. What's so secret that the leaders of the world can't bring the cameras into the Bilderberg meeting or the Trilateral Commission meetings? If they really have our best interest, why don't they just broadcast it? In my experience what needs to be kept behind closed doors is sex money and power. So, it's all about holding the wealth, it's all about a lot of perverted sexuality and child abuse and that type of thing. And about how do we consolidate the power of rather human beings.

**LILOU:** Even sex only. Do you think they do speak about sex behind those doors and they can influence that?

**FOSTER:** Well, they not only speak about it. But there are major rings world wide of Paedophilia and satanic ritual and so forth. In which a lot of these people are involved. It's unfortunately a global epidemic of child torture, and it's not a subject that we promote a lot because often times it sounds so incredible that people don't want to go into it. But there are resources for those who feel ready to actually experience what is for me the bottom of the barrel; it's the lowest of low. Anything that I found in my research, there are plenty of... Just look up on the Internet, Cathy O'Brien and Brice Taylor and people like these who were involved and who've gotten out, escaped and more protected and are blowing a whistle and written books and done videos and so forth. And the reason this is important is number one, to protect these millions of children who are being abused in this way and disappearing and horrible things happening to them.

But secondly, so that we understand just how dangerous these people are, who are actually controlling the banks and the militaries and the nuclear weapons and so forth. Because once you cut off your own compassion to that extent, then pushing a nuclear burden especially if you are old and frustrated or whatever, doesn't seem like that big a deal to those kinds of people. So, hopefully that will help wake the rest of us up to that these people need help. But they need to be taken out of power and they actually need to not have concentrations of power that allow for any human being to have that kind of power of rather human beings. And that's a lot of what we are exploring in the whole liberty and solutions initiatives of thrive.

**LILOU:** So, media are alert into those big medias on TV actually inject this fear, inject those ideas. That's

how they communicate to the population?

**FOSTER:** Well, sometime if you can put yourself through watching a mainstream media news show. Just ask yourself at the end of it, how I'm feeling. And probably very confused and very afraid. And that's a lot of the initiative of the main stream media is number one to make money. So, if it bleeds it leads as they say. They'll put on the glory stuff because people get riveted to it, they have to satisfy their particular sponsors who are usually the drug companies and the military industrial complex and so forth. So, they'll promote the upcoming wars and all that type of thing. But ultimately they are working for the higher agenda of keeping people distracted by Hollywood scandals or by a little incident here or there, and meanwhile they are not realizing the billions of dollars a month are being stolen out of your pockets out of your children's pockets by the central bankers. And more and more wars are being covertly initiated by executive orders or intelligence agencies, rather than having anything to do with the people or justice or compassion for other societies.

**LILOU:** Does the president knows exactly what they are going into when they sign up for this, or can they be actually once they are in position be very surprised of finding out so many things. Is that something even may be planned a long time in advance?

**FOSTER:** I think this days, there hasn't been a president secretary defence or secretary of the treasury who hasn't been a member of at least one of the secret societies for probably 40 to 50 years. So, it's my belief that no one gets up to be like in this country the presidential or vice presidential candidate for either Republican or Democrat party, without not only having signed up for that agenda but proving themselves willing to enact that agenda all the way along. Because when the controllers are putting a puppet in place to run their agenda, they can't have any doubts to whether he or she is going to go along with it.

**LILOU:** So, right-left Democrat, Republican all that is about the same. Those are just labels? Without going into politics, but you know.

**FOSTER:** Yeah. At the top, they are working for the same agenda and you can see at the top the Republicans and Democrats don't speak against the wars, they don't speak out against the banks. In most cases they don't speak out about the health issues and so forth. There are some politicians who I respect a lot for their honesty and their consistency, people like Dennis Kucinich and Ron Paul, they are working within a political system but at least they are trying to do it honestly. And they are actually trying to have things work for people, but you can see the great extent that the media and the traditional parties go to marginalize them. Because they don't want them coming into a position of authority.

**LILOU:** Is there some other things that we need to point out before we go into the whole thrive, the amazing part two that I'm going to have some, get so much juice out of I feel.

**FOSTER:** Well, that's enough for me.

**LILOU:** This is pretty.

**FOSTER:** Probably for your listeners.

**LILOU:** Yes. Thank you so much. I'm excited to speak in this part two now about the solutions. Thank you so much Foster. Stay with us.
